Green Inter-e-mobility

- Synergy with other EU projects (The CEF Crocodile II and the Interreg Europe E-MOB project).
- ✓ Interreg Europe E-MOB project – Integrated actions towards enhanced e-mobility in European regions <https://www.interregeurope.eu/e-mob/>
- ✓ The Green Inter-e-mobility is the Greek Good Practice of E-MOB

Green Inter-e-mobility

- Synergy with other EU projects (The CEF Crocodile II and the Interreg Europe E-MOB project):
 - ✓ CEF Crocodile II project on Intelligent Transportation Systems
<https://www.interregeurope.eu/e-mob/>
 - ✓ The Green Inter-e-mobility project is inspired by the Crocodile vehicle-infrastructure communication system.

The screenshot shows the website crocodile.its-platform.eu. The page features a navigation menu with links for Home, Events, Calendar, Projects, Achievements, Downloads, and Helpdesk. Below the navigation is a main content area with a text block stating: "Within CROCODILE public authorities, road administrations and traffic information service providers of in total 13 European Member States are committed to set up and operate a data exchange infrastructure based on DATEX II. That infrastructure will be used to exchange data and information between all involved stakeholders, including private partners, with the goal to provide harmonised cross-border traveller information services along the whole corridor. A specific focus within CROCODILE will be on safety-related and truck parking information services." Below this is a "Highlights" section with a map of Europe showing the Crocodile corridor route through various cities and regions, including Linz, Prague, Vienna, Graz, Budapest, and Munich. To the right of the map is an "ORGANISATION" section with text describing the beneficiary and the public authority's role in the project.
